2017-18 PE and Sports Premium Report - October 2017

PE and Sports Premium funding is provided by government to make additional and sustainable improvements to the quality of PE and sport on offer at One Degree Academy.

For example to:

- develop or add to the PE and sport activities that your school already offers
- build capacity and capability within the school to ensure that improvements made now will benefit pupils joining the school in future years

Department for Education Recommendations

The Department for Education recommends in its guidance that PE and Sports Premium (SP) be used for:

- the engagement of all pupils in regular physical activity - the Chief Medical Officer guidelines recommend that all children and young people aged 5 to 18 engage in at least 60 minutes of physical activity a day, of which 30 minutes should be in school
- the profile of PE and sport is raised across the school as a tool for whole-school improvement
- increased confidence, knowledge and skills of all staff in teaching PE and sport
- broader experience of a range of sports and activities offered to all pupils
- increased participation in competitive sport

For example, funding might be used to:

- provide staff with professional development, mentoring, training and resources to help them teach PE and sport more effectively
- hire qualified sports coaches to work with teachers to enhance or extend current opportunities
- introduce new sports, dance or other activities to encourage more pupils to take up sport and physical activities
- support and involve the least active children by providing targeted activities, and running or extending school sports and holiday clubs
- enter or run more sport competitions
- partner with other schools to run sports activities and clubs
- increase pupils' participation in the [School Games](#)
- encourage pupils to take on leadership or volunteer roles that support sport and physical activity within the school
- provide additional swimming provision targeted to pupils not able to meet the swimming requirements of the national curriculum
- embed physical activity into the school day through active travel to and from school, active playgrounds and active teaching

Our Allocation

For September 2017 - 18 we expect a grant of up to **£16070**.

We have set out below how we intend to spend this money, its expected effect on sports participation and how we ensure this is sustainable.

This is our first year receiving SP funding and we will report in October 2018 on its impact.

SP Anticipated Spend in Primary:

Enfield PE Service Partnership (£8000)

We will buy into the Enfield PE service to help develop the PE provision at One Degree Academy. This will include the provision of a PE specialist to:

- to develop and team teach with our staff high quality PE sessions
- to develop and deliver One Degree Academy's first after school gymnastics club
- to improve our physical education resources and curriculum planning
- to advise on how best to deliver Physical Education across the school
- to champion One Degree Academy in borough wide PE competitions, such as gymnastics

Anticipated Effect: We envisage this will improve the quality of the provision. Support the development of staff. Create a set of resources and planning for future years. It will improve the visibility and status of physical education across the school and encourage wider participation.

How will this be sustained: The development of curriculum plans, staff resources and the up skilling of teachers, will mean in following years as the school grows the quality of the PE provision can be sustained and continue to be delivered.

Physical education equipment (£2500)

As a new school, with limited resources, we will seek to purchase high quality specialist gym equipment.

Anticipated Effect: This will allow children access to the very best equipment and encourage the uptake of PE across the school.

How will this be sustained: We will seek to purchase quality equipment that can be used over a number of years and by multiple year groups as the school grows.

Teacher Development (£1500)

We will employ additional staff to enable additional capacity for trainee staff to team teach with and observe PE specialists.

Anticipated Effect: This will develop our PE teaching, enable teachers to include PE across the curriculum and in outdoor practice time.

How will this be sustained: This learning will enable staff to make use of these skills in future years.

Volunteering (£4000)

We will develop and embed a programme of physical activity, led and championed by senior staff. Children will be able to engage in physical activity through the One Degree's volunteering programme, where children make an active contribution to the physical environment. Initially this could include building flower beds, sweeping, weeding, cleaning and litter picking.

Anticipated Effect: This will improve fitness through physical activity whilst making a wider contribution to school life. It will develop the physical skills and coordination of our children.

How will this be sustained: This will embed a culture of satisfaction from physical activity. As our children grow they will role model this culture to younger students.

Conclusion

We will review the impact of SP throughout the year. This will be reported to governors. We will then update this report, with our findings and spending plans for next year. We anticipate this to be in October 2018.
